CFD Package

**INTEGRATED
ENVIRONMENTAL
SOLUTIONS**

Our CFD package is specifically designed for the needs of the building industry. Get the answers you need quickly and easily! With an easy to use interface, most of the effort is taken away, and CFD studies can be incorporated as a vital part of the design process. Excellent graphics make the results easy to understand, and enable you to communicate effectively with your clients.

- Calculate airflow and heat transfer in and around buildings, taking into account boundary conditions such as the effects of climate, internal energy sources and HVAC systems.
- Investigate in detail natural and mixed mode ventilation strategies.
- Predict occupant comfort temperatures, air temperature and airflow; optimise supply grille placement.
- Analyse outdoor wind flow effects and pedestrian comfort and safety.

Module	Description	Standalone Annual License	Standalone Rolling License
ModelIT	VE-Pro module for 3D geometry creation, data assignment and import functions	€250	€600
ApacheSim	Fast, accurate dynamic thermal simulation for energy/carbon modelling and much more...	€850	€2000
MicroFlo	Model exact patterns of airflow occurring in and around a building, the distribution of heat, and even contaminants	€1750	€4350
List Price		€2850	€6950
Discounted Offer		€2200	€2400

First Year: Pay for Annual (Rental) license type

Second Year: Transition to Rolling (Permanent) license type. Use your investment from Year 1 rental (€2200) and subtract it from the Rolling (Permanent) License price cost. You essentially get Year 1 for free!

Third Year: Pay the 15% maintenance fee on the list price of the software.

Fourth Year: (and every year thereafter): Pay the 15% maintenance fee on the list price of the software.

For a 10% fee, you purchase your software with quarterly payments.

Year 1 Rental = €2200

Year 2 Price = €2400

*Special offer to rent before you buy!
